NOTE: The categories and questions are assigned at random and, while it is unlikely, you may experience some repetition in categories or questions. Therefore, if you are familiar with the categories that appear in any particular round, you may exercise the option of changing the categories displayed by pressing BUTTON 2. After the first "answer" has been selected, you will not be allowed to reshuffle the categories. Please note that some categories have numerous "answers." If a category reappears, it does not necessarily mean that you will receive the same "answers."

NOTE: To activate the pause feature during the game, press the START BUTTON; the message "PAUSED" will be displayed across the center of the screen. To continue playing, press the START BUTTON and the "PAUSED" message will disappear. The game may not be paused when the countdown timer is activated.

After player 1 has chosen a category and a wager, the "answer," will appear on the screen. So that both players can read the "answer" there is an approximate 5 second time delay. You will not be allowed to buzz in until the timer, located near top center of the screen, starts. Once the timer has begun, any player can buzz in. (See How to Use Your Game Gear for instructions on how to buzz in.)

NOTE: During a one player game, the player will buzz in by pressing BUTTON 1. During a two player game, player one will buzz in by pressing the DIRECTIONAL BUTTON, while player two will buzz in by pressing BUTTON 1.

The player who buzzes in first will be given the chance to enter a response. The computer will identify the

player by lighting up his/her podium. The player who buzzes in first will have control of the board. The "answer" will reappear on the screen, along with the first part of the "question" (Who is..., or What is..., or What are..., etc.). Also displayed on the screen will be the player number (1 or 2), in the upper left corner. Located at the top center of the screen is the response timer, which counts down from 60 seconds. At the bottom of the screen, you will find a box containing the alphabet and numerals 0-9, along with DEL, SPC (space) and END. You will complete your response in this area. To input your

response, using the DIRECTIONAL BUTTON, move the cursor to highlight the letter(s)/number(s) that you wish to select. Lock in your selection by pressing BUTTON 1. To delete a letter press BUTTON 2 or highlight DEL and press BUTTON 1. To lock in your complete response, highlight END and press BUTTON 1.

NOTE: Once you have locked in your response, you will be unable to change it.

If you have entered the correct response, the computer will display the message CORRECT and add the appropriate amount to your earnings. If you answered incorrectly, the computer will display the message INCORRECT and deduct the wager from your accumulated earnings. If the response is incorrect, the "answer" will reappear on the screen giving the other player a chance to buzz in. If no player buzzes in within the time allotted,

the correct response will be displayed on the screen. The player who had the last correct response retains control of the board. Play will continue until the board has been cleared.

THE DAILY DOUBLE

During play, a hidden DAILY DOUBLE appears in one of the 30 windows on the board.

(The placement of the DAILY DOUBLE is at random.) If you are the player who has uncovered the DAILY DOUBLE, you automatically shut out the other player and get to try the "question" alone.

If your accumulated earnings exceed the maximum amount on the board (\$500; JEOPARDY!, \$1000; DOU-

BLE JEOPARDY!), you may bet all or part of your accumulated earnings. If your total accumulated earnings are less than the maximum on the board, you may wager an amount as follows:

JEOPARDY!

\$100

\$200

\$300

\$400

\$500

DOUBLE JEOPARDY!

\$200

\$400

\$600

\$800

\$1000

Using the DIRECTIONAL BUTTON, enter your wager. To lock in your wager, press BUTTON 1.

Using the DIRECTIONAL BUTTON, enter your response. To lock in your response, press BUTTON 1.

Only the player who picked the DAILY DOUBLE will be allowed to respond. If the player answers incorrectly, play continues and the player makes another selection on the board.

If your response is correct, the value of your wager is added to your score; if you are incorrect, it will be deducted.

In the JEOPARDY! round there is one DAILY DOUBLE. In the DOUBLE JEOPARDY! round there are two DAILY DOUBLES.

HOW TO PLAY DOUBLE JEOPARDY!

Once the JEOPARDY! board has been cleared, the DOUBLE JEOPARDY! round begins.

The player with the least amount of accumulated earnings will start the DOUBLE JEOPARDY! round.

DOUBLE JEOPARDY! is played in the same manner as the JEOPARDY! round, except that the categories will change and the dollar values on the board will double. As in JEOPARDY!, the categories can be reshuffled by whoever has control of the board.

If you, the player, are in control of the board, you can choose to reshuffle. If the computer player is in control for the second round, you can not reshuffle the categories.

HOW TO PLAY FINAL JEOPARDY!

Note: Only players showing a positive dollar value at the end of the **DOUBLE JEOPARDY!** round will be allowed to compete in the **FINAL JEOPARDY!** round.

First, the **FINAL JEOPARDY!** category will be displayed. At this time, the contestant with the least amount of earnings will be prompted to place his/her wager. Press **BUTTON 1** to lock in your wager.

Note: At this time, all players should turn away from the screen and should stay turned away until the contestant(s) has/have completed placing his/her wager(s) and entering his/her response(s).

A player may bet all, part, or none of his/her accumulated earnings. After the wager has been placed, the "answer" will appear on the screen. The player must enter his/her response at this time. Press **BUTTON 1** to lock in your response.

Continue in this manner until all contestants have placed their bets and have entered their responses.

The computer will now reveal the "question" to the **FINAL JEOPARDY!** "answer." Then, each player's response and wager will be revealed. At this time, the computer will display a message telling the player if his/her response was correct or incorrect. The scores are then adjusted accordingly.

The player with the highest accumulated earnings will be the **NEW JEOPARDY! CHAMPION!**

MESSAGE TO PLAYERS

This game Cartridge uses a program which randomly accesses the puzzles. When your **SEGA GAME GEAR** is

turned off, the entire question file is cleared. The categories and "answers" are chosen at random by the computer. Although there are over 1,700 "answers" in over 300 categories, repetition may occur. If you come across any duplicate categories you have the option to reshuffle your choices if you are in control of the board.

HINTS ON GAME PLAY

Words should be spelled as accurately as possible. The program will allow for some minor misspellings. Be sure to check your response before locking in.

If your "answer" deals with a person, try to give his/her full name.

If the "question" is number oriented, the program will allow for either the spelling of the number or its numeric equivalent.

HANDLING YOUR CARTRIDGE
